

REMARKS

The original claim set has been canceled and new claims 38-74 have been introduced such that the language of the claims better conforms to the rules of U.S. practice. No new matter is introduced into the application through the introduction of the new claims. Support for new compound claims 38-60 is found in original claims 1-23. support for new process claim 61 is found in original claim 24. Support for new pharmaceutical composition claim 62 is found in original claim 25. Support for new method of treatment claims 63-74 is found in original claims 26-37.

The change to page 57 of the specification is made to correct an obvious typographical error. According to the chemistry described in that example, only 1-(4-piperidylmethyl)pyrrolidin-2,5-dione hydrochloride can be obtained; indeed, no compound corresponds to the incorrect nomenclature originally set forth.

No new matter is introduced into the application by any of the amendments set forth herein.
